### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The instant application discloses a finger for effectively processing signals received via multipath in a receiver of a mobile communication system and a RAKE receiver having the finger. Prior art references show similar methods but fail to teach **“wherein said channel estimating apparatus includes a channel state estimator for receiving said multiplexed signals from said multiplexer to estimate channel information on the signals per the plurality of the antennas using a time division method, a demultiplexer for demultiplexing the output signals from said channel state estimator and a plurality of storage means for storing said demultiplexed signals from said demultiplexer, so that channel information on each of said antennas basis is estimated”**, as in claims 1 and 9, and **“a first sub-step of extending the distance between said de-spread signals to produce transformed de-spread signals; and a second sub-step of transmitting said transformed de-spread signals to said fourth step and said fifth step, respectively”**, as in claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
